

HDI Predictor Documentation

Customer Journey Map

Date	12 June 2025
Team ID	SB-GENAI-HDI-2025
Project Name	HDI Predictor - Human Development Index Classification System
Prepared By	Kankipati Sai Venkat

Phase of Journey	Stage 1: Discover	Stage 2: Input & Predict	Stage 3: Interpret & Act
Actions	Opens the HDI Predictor web app; reads the short project description	Enters life expectancy, mean/expected years of schooling, and GNI per capita into the form and submits	Reviews the predicted HDI tier and score; compares against a second country or scenario
Touchpoint	Landing page / project README	Flask input form, "Predict" button	Results panel showing tier, score, and confidence
Customer Thought	"Is this tool accurate and easy to use?"	"Did I enter the values in the right units?"	"Does this match what I expected? What's the weakest indicator?"
Customer Feeling	Curious but slightly skeptical	Focused, a little unsure about input formats	Satisfied when the classification matches known benchmarks; empowered to explore further
Process Ownership	Frontend / UX	Backend validation & ML inference (RandomForestClassifier)	Results rendering & feature summary
Opportunities	Add example/sample input values on the landing page	Add inline input validation and unit hints (e.g., years, USD PPP)	Add a feature-importance breakdown to explain the "why" behind the tier
