

HDI Predictor Documentation

Project Demo Planning

Date	10 July 2025
Team ID	SB-GENAI-HDI-2025
Project Name	HDI Predictor - Human Development Index Classification System
Prepared By	Kankipati Sai Venkat

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain what HDI is and the gap this tool addresses	2	Sai Venkat
2	Solution Overview & Architecture	Walk through the Flask + RandomForest + Docker architecture	2	Sai Venkat
3	Live Demo — Scenario 1 (Very High HDI)	Enter high-performing indicator values and show the predicted tier	2	Sai Venkat
4	Live Demo — Scenario 2 (Medium HDI)	Enter mid-range values and highlight the feature-importance explanation	2	Sai Venkat
5	Live Demo — Scenario 3 (Low HDI)	Enter low-performing indicator values and discuss the intervention use case	2	Sai Venkat
6	Q&A Session	Answer evaluator questions on model accuracy, deployment, and design choices	3	Sai Venkat

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Set context: why manual HDI computation is a pain point
2	Solution Overview	Show the architecture diagram and technology stack

3	Live Feature Demonstration	Run all three scenarios back-to-back inside the running Docker container
4	Q&A Session	Be ready to discuss model accuracy (97.6%), dataset, and future roadmap
